KNOW-HOW

Lifting/working tables

Handling-devices

Roller/measuring tracks

Gluing presses

Lifting tables and height adjustable worktables

Lifting tables and height-adjustable worktables ensure ergonomic workplaces and, by extension, healthier and thus more efficient employees. Lifting tables from the NIVEAU series, the extremely resilient or super-flat TransLift lifting tables or the diverse SUPPORTER all have one thing in common: They add the height needed for ergonomic work to the workpiece to be processed. The comprehensive range and diverse accessories ensure that you will have the right table for any use.

Handling devices

Handling devices are the daily helpers that facilitate work. The mini-lifter TEAMER lifts loads to the desired level in a back-compatible manner. We also offer the transport carts TRAPEZ, MULTI-CAR and CADDY for more efficient material logistics.

Roller and measuring tracks

Precise work is made easy with the roller and measuring tracks. The stop carriage is fastened in the desired position. Precise shortening, sawing, etc. are easy. Many versions adjust to the requirements of different areas of application.

Gluing presses

BORA - the universal perforated plate gluing press for the production of doors, frames, fillings, steps, etc. The perforated plate system permits almost every imaginable use in connection with different functional elements.

Cabinet elements, drawers and other geometric bodies can be securely and quickly glued with the body press device. BORA has a comprehensive range of accessories.

KONTRA Star is the three-level version of the gluing presses in the established KONTRA series. Rotation around the centre axis permits free access to all levels. The KONTRA Star has a pressing length of up to 6,000 mm.

LogDos - Glue dispenser

LogDos glue dispensers permit highly economic gluing. The containers are available in different sizes and with a great range of accessories.

SERVICE

The Beck team stays always at the latest state of the art and knows precisely what its customers want. Feel free to contact us if you have any questions, suggestions or information to exchange.

Beck machines have been established on the market for many years. They are subject to continuous further development. New machines supplement and complete the machinery range and thus adjust to the wishes and needs of the pros who work with them every day. Service is vital to us!
